ROCKY M. PABALATE

Software Developer

Guadalupe , Carmen, Bohol | 09078859175 | dev.rocky.pabalate@gmail.com

SUMMARY

Develops mobile applications, builds robust backend systems, and manages databases efficiently. Enhances projects with growing web development skills to deliver full-stack solutions and drive continuous improvement in team workflows.

TECHNICAL SKILLS

- Mobile Development: Flutter & Dart
- Backend Development: Node.js & Laravel
- Web Development: React.js
- Databases: MySQL, Supabase, Firebase
- Version Control: Git, GitHub

EXPERIENCES

Internship at Blenditoro Corp **Jun - Aug 2024**

- Completed 320 hours of industry-based training in the IT sector
- Served as a Front-End Mobile Developer, focusing on building cross-platform applications using Flutter and Dart.

Mobile Development Mentor – Computing Society Workshop **Nov 2024 & Apr 2025**

- Served as a mentor for mobile development seminars, delivering technical guidance and practical insights to computing students under the College of Technology BISU-Bilar.

PROJECTS

- **Food AI (Flutter)**: Mobile app using CNN machine learning to identify dishes and generate recipe details.
- **BISU ROTC Attendance with QR (Flutter)**: Attendance system for ROTC cadets featuring QR code scanning for efficient check-ins.
- **Techno Concern (Flutter + Supabase)**: Platform for users, technicians, and admins to submit and manage hardware or software technical concerns.
- **Ebaybaymo Projects (Mobile App)**: Machine learning app that translates Baybayin script into modern text for easier understanding and use.
- **Food AI Server (Node.js)**: Backend service for the Food AI app, handling user authentication, recipe management, and custom recipe creation.
- **Food Image Processing (Python)**: Image recognition module using a pre-trained CNN model to classify dishes from photos with high accuracy.
- **OPC – Online PC and Laptop Store App**: E-commerce app where users can browse products, add items to cart, and complete purchases via Stripe integration.
- **Food AI Web (Python + Streamlit)**: AI-powered web application for recipe discovery and generation from food images, featuring upload functionality, chatbot support, and image-based cooking suggestions.

ACHIEVEMENTS

National Conference on Computing, Education, and Business (NCCEB) 2024 **May 2024**

- Awarded 1st Place in the IT/CS Track for presenting the research paper "FOOD AI – An Integrated Web Platform for Image-Based Food Recognition, Recipe Generation, and Comprehensive Food Information"

EDUCATION

Bachelor of Science in Computer Science

Bohol Island State University - Bilar Campus (2021 -2025)
